El Salvador

Statistics:

Population: 6,340,454 (2013)

Urban Population: 65,775% of total (2013)

Infant Mortality Rate: 13.5 per 1,000 live births (2013)

Age Dependency Ratio: 58.978% of working age population

Government:

Official: Name Of Country: Republic Of El Salvador

Leader: President Sanchez Ceren

Government Control Of Economy:

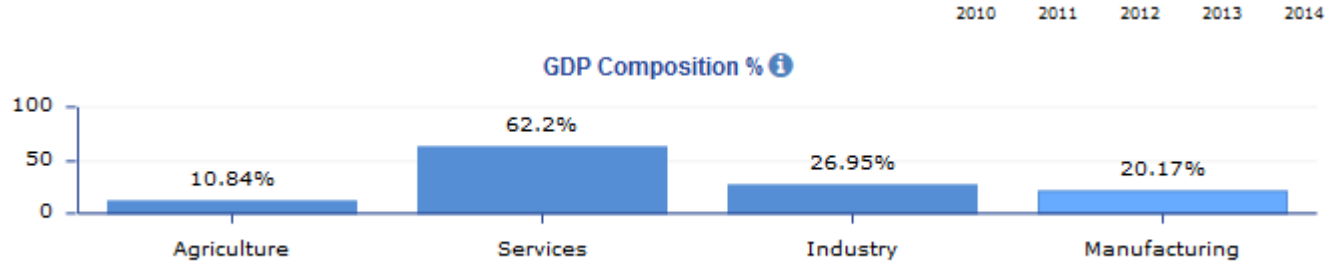
		66.2	

1 100

Economics:

Income Level = Lower Middle
GDP per capita = 7,764
GDP growth %= 1.676%

Level of Development = Developing
GDP PPP = $49 billion
GDP rank = 104 out of 192



Top 2 products exported: Apparel: knit, Plastics.
Top 3 trade partners: United States, Guatemala, Honduras.
Top industries: Food: Processing; Beverages; petroleum; chemicals

Our GDP is not growing
Prices are staying still.

Weaknesses:

-Low technology
-Low income
-Corruption is high

Strengths:

-economic freedom
-High urban population
-Control inflation

Recommendations:

My recommendation to El Salvador's government is to stop corruption and provide security.

Executive Summary

El Salvador is a country in Central America. The government system is a Republic. The head of the government is the president Sanchez Ceren. El Salvador's economic system is Mixed. One of El Salvador's weakness is that they have a high unemployment rate and one strength is that they manage inflation efficiently.
